

DIVVYA B NARAYAN

UI/UX & Product Designer

M: +61 466487372 E: divvyabnarayan@gmail.com L: [LinkedIn](#) P: [Portfolio](#)

About Me:

I am a Product and UX Designer passionate about solving complex user and business challenges through human centred design. I am passionate about translating user research into practical digital solutions using design systems, rapid prototyping, and AI supported workflows. I have experience in collaborating across multidisciplinary teams, where I enjoy creating scalable, accessible experiences that improve usability, support digital transformation, and deliver meaningful outcomes.

SKILLS:

Design: User Research | Usability Testing | Design Systems | Journey Mapping | Wireframing | Figma Prototyping | AI Assisted Ideation | Heuristic Evaluation | AI Native Prototyping

Growth & Marketing: Conversion Rate Optimisation | Growth Experimentation | A/B Testing | Funnel Analysis | User Acquisition | Retention & Engagement | Campaign Design | Behavioural Design | Analytics & Performance Tracking

Tools: Figma | Adobe Creative Suite | Cursor | Claude | Hotjar | Sketchup | Miro | Filmora | Framer | Wix | VS Code | Jira | GA4

Front End: HTML | CSS | JavaScript

Soft Skills: Systems Thinking | Presentation Skills | Problem Solving | Adaptability | Detail Oriented Execution | Team Player

RELEVANT EXPERIENCE:

UX Designer

February 2026 - April 2026

Flip Australia

- Led end-to-end website redesign, using a mobile first, accessibility focused approach to improve usability and conversion across telecom and NBN plan customer journeys.
- Designed wireframes and high-fidelity interactive prototypes in Figma, improving onboarding flow clarity and contributing to a 20% improvement in task efficiency across key user journeys.
- Applied AI assisted design workflows to accelerate ideation and reduce iteration cycles by approximately 30%, improving design efficiency during discovery and solution development phases.
- Conducted usability testing and customer journey analysis, identifying friction points that contributed to a 15% increase in conversion rate and improved interaction design performance.
- Collaborated with cross functional stakeholders to align user needs with business objectives, reducing feedback loops and improving delivery efficiency across product development cycles.

UI/UX Designer

January 2023 - April 2024

Accenture, Avanade

- Designed enterprise UI components in Microsoft Power Apps for Disposition Planner and Balanced Scorecard tools, supporting cross functional client teams in operational decision making.
- Developed three GenAI focused design perspectives (GenAI Figma Plugin, GenAI in Healthcare, Card Sorting), contributing to Accenture's thought leadership in AI driven design innovation.
- Collaborated with business, engineering, and design stakeholders to translate user and business requirements into product solutions, improving clarity of requirements and client engagement outcomes.
- Contributed to a sustainability focused design research report that was incorporated into Accenture's internal knowledge base to support more informed, consistent, and scalable design and strategy decisions.

ADDITIONAL EXPERIENCE:

Technology Consultant

June 2024 - Present

JB Hi-Fi

- Consistently exceeded sales targets across multiple departments, including computers, smart home, audio, and telecommunications, achieving gold stars for performance.
- Achieved No.1 ranking in computer and telecommunications sales for 5 consecutive weeks, demonstrating strong product knowledge and customer engagement.
- Increased attachment rate of additional services from 1.0 to 2.5 per transaction through effective needs analysis and consultative selling.
- Managed high volume customer interactions (30+ customers per hour during peak periods) while maintaining a 95% customer satisfaction rate and strong service quality.

SELECTED PROJECTS:

Calma Pod - An anxiety breathing support system | 2026

- Researched anxiety triggers among university students through qualitative methods to identify opportunities for improving mental well-being in high pressure academic environments, validating key stress patterns across participants.
- Designed the Calma Anxiety Breathing Support Pod using human centred and sensory design principles, with user testing indicating improved perceived calmness and emotional regulation during prototype evaluation.
- Developed thorough user journeys, service concepts, and iterative prototypes in response to usability feedback, improving clarity, accessibility, and ease of interaction across design iterations.
- Evaluated integration of physical and digital interaction touchpoints, with Arduino prototype testing showing stronger user preference for guided breathing and sensory reduction features in stress scenarios.

Little Sprout - A pregnancy tracker app for parents | 2025

- Designed a pregnancy tracking platform to support expectant parents and improve communication with healthcare providers across all stages of pregnancy.
- Conducted user research and journey mapping to identify key pain points in prenatal care, including information gaps and fragmented care experiences.
- Created user flows, wireframes, and high-fidelity prototypes in Figma to support appointment management, tracking, and health updates.
- Applied service design principles to ensure continuity of care and improved accessibility of maternal health information.

EDUCATION:

Master’s of Design - University of New South Wales

May 2024 - May 2026

Immersive and Interaction Design (Human Centred Design)

76 WAM

Australia Global and International Student Scholarship Awardee

Best Design Award in Cursor Hackathon

Bachelor’s of Design - PES University

August 2019 - June 2023

Product and Graphic Design

9.6 CGPA / 10 CGPA

MRD Scholarship Awardee

CERTIFICATIONS:

Google Analytics | 2026

Leadership Foundation Program - UNSW | 2025

IBM Enterprise AI Design Thinking | 2023

Google UX Design Professional Certificate | 2022
